

THE HIGHEST QUALITY

100% UV STABLE COATING SYSTEM *IN THE INDUSTRY!*

YOUR **GARAGE**.COM
—CAVE—

BUILT ON SERVICE, BACKED BY QUALITY!
www.yourgaragecave.com

As an industry leader, we've revolutionized protective flooring with superior polyaspartic coating technology and an installation process guaranteed to last. With our expert installers, your concrete slab transforms into a stunning, long-lasting floor built to withstand the toughest conditions because **QUALITY** is our main priority!

100 % POLYASPARTIC RESIDENTIAL FLOOR COATING AND INSTALLATION

Enhanced Aesthetics

Our coatings come in a variety of colors, textures, and finishes, transforming plain concrete into a stylish surface for spaces like basements and garages.

Increased Durability

A protective barrier shields concrete from foot traffic, weather, and daily wear, extending its lifespan and reducing repair needs.

Easy Maintenance

Resistant to stains from oil, dirt, and spills, our coatings make cleaning effortless.

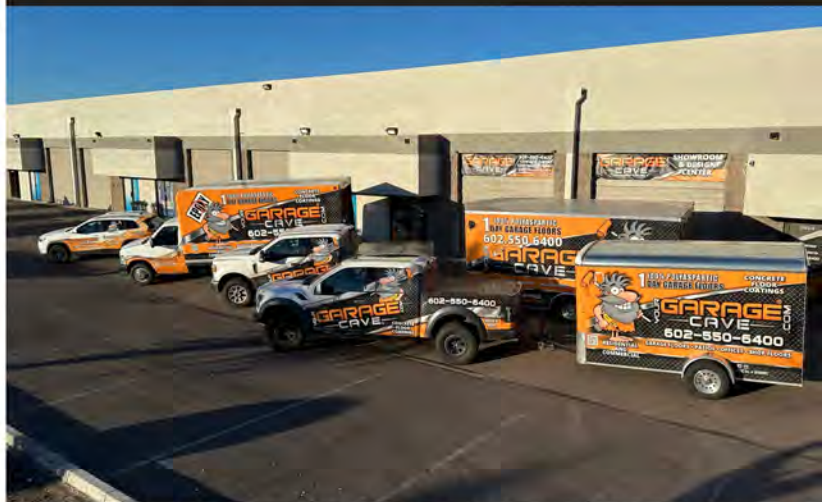

Quick Installation

Many of our systems can be installed quickly, minimizing disruption so you can enjoy your upgraded floors sooner.

Lifetime Warranty

Our high-performance floors are built to last, giving you quality and peace of mind for the life of your home.

Amazing workmanship & quality. The staff are so attentive to detail & professional. I am very thankful I found them & wouldn't go anywhere else for future projects

HOW IT WORKS

STEP 1

PREPARE

Inspection & Moisture Testing: We check for cracks, pitting, old coatings, and moisture to prevent adhesion issues.

Concrete Preparation: We use a concrete floor grinder to remove a thin layer of concrete, eliminating contaminants and ensuring maximum adhesion for the bond coat.

Repairs & Cleaning: Cracks and surface imperfections are repaired, followed by a thorough cleaning to remove dust and debris.

Final Check: A last inspection ensures the surface meets our high standards before coating begins.

STEP 2

COAT

Bond Coat: A heavy-duty base coat penetrates deep into the concrete, creating a tight bond that will last for years.

Media Broadcast: We then broadcast a heavy blanket of decorative flake into the bond coat, forming a tough, textured foundation ready for the final coating.

Finishing Touches: Once cured, excess flake is removed for a smooth, even finish.

STEP 3

SEAL

Surface Prep: The surface is inspected and cleaned of loose flake and dust to ensure strong adhesion for the final layer.

Encapsulation Coat: A chemical and UV-resistant topcoat seals the surface.

Optional Additives: Anti-slip can be added for extra durability and safety.

Final Inspection: After curing, we check for a flawless, long-lasting finish.

COMMERCIAL FLOOR COATING & INSTALLATION

Your **Garage Cave** protective coatings belong in your factory, machine shop, warehouse, parking garage, or anywhere that concrete flooring needs protection from chemicals, heavy traffic, and other abrasive elements.

Enhanced Durability & Chemical Resistance

Our coatings withstand heavy foot and vehicle traffic, as well as exposure to harsh chemicals, making them ideal for demanding environments.

Ease of Maintenance

Resistant to stains from oils, chemicals, and contaminants, our coatings make cleaning easier and help maintain a professional appearance.

Quick Installation

Many systems can often be completed in one day, minimizing downtime and disruption to business operations.

Cost Savings

Our coatings can reduce long-term maintenance and repair costs, making them a wise investment for businesses over time.

Improved Safety

Slip-resistant properties help prevent accidents in areas where safety is concerned, like entrances, ramps, and loading docks, reducing liability concerns.

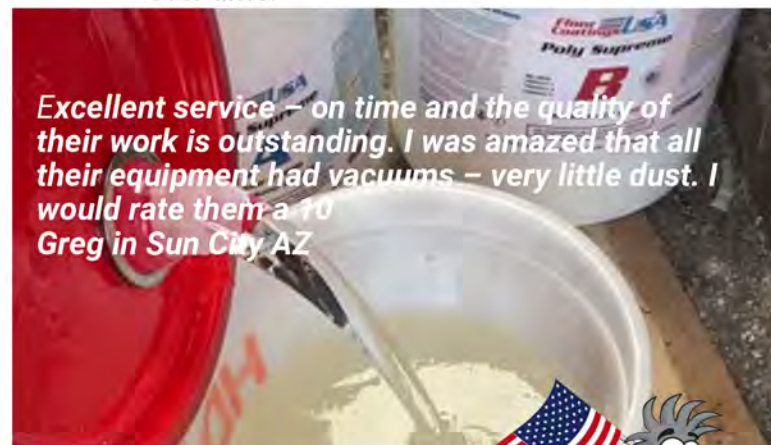

Protection from Weathering

Our systems can shield concrete from UV exposure, moisture infiltration, and freeze-thaw cycles, preserving the structural integrity of the substrate.

Sustainability

With low to no volatile organic compound (VOC) content, our coatings contribute to eco-friendly initiatives and can help businesses achieve LEED certification.

Excellent service – on time and the quality of their work is outstanding. I was amazed that all their equipment had vacuums – very little dust. I would rate them a 10

At **Your Garage Cave**, we take pride in delivering top-quality flooring systems that last. That's why we back our residential floor installations with a Lifetime Guarantee against yellowing, delamination and hot tire pick-up.

We leave the **VALUE** on your floor!

What Makes Our Warranty Different?

Not all warranties are created equal. Here's how Your Garage Cave stands apart from the competition:

We've been here for over 10+ years—and we'll be here for the next 10+ more. Some competitors disappear after a few years, leaving you with no recourse if issues arise. Your Garage Cave is here to stay.

Clear and fair terms. Many competitors use vague language or hidden clauses to avoid honoring warranty claims. We provide clear coverage details and stand by our promise.

No surprise exclusions. Some warranties exclude common issues or blame you for problems caused by poor installation. We take responsibility for what's ours.

Responsive support. If an issue arises, we act fast to resolve it. You won't be left waiting or ignored.

Proven reputation. Many competitors don't have the track record to back their claims. With FCUSA, you're partnering with the most trusted name in the industry.

What Our Customers Say

I was very pleased working with this company. I met Char (the owner) at the Home Show and she's very personable and doesn't talk over your head. The 3 guy crew started at 8:30 and was done by 1:30. They were very professional and cleaned up the area well. Highly recommend this company!!! Professionalism, Quality, Responsiveness, Value
Zachary R

Yourgaragecave went above and beyond when I filed a warranty claim. They were so professional and made the entire process simple and stress-free."
— Brian L.

What's Covered?

With FCUSA, you're not just getting a durable, beautifully crafted floor—you're getting the confidence of knowing we'll stand by our work for years to come. Our warranty guarantees against NO Yellowing, no peeling, no hot tire pick up, NO delamination caused by improper preparation or installation.

What's Not Covered?

While our floors are built to endure, certain factors are outside our control, including:

- Damage from heavy impacts or recurring cracks
- Concrete issues, such as moisture or structural failure
- Discoloration due to spills: Battery Acid, break fluid, Bleach
- Environmental conditions or misuse

We'll provide detailed care instructions to help keep your floor in top condition.

CLEANING GUIDE

Your **Garage Cave** floor is built to last, but keeping it clean is essential to maintaining its beauty and performance. Follow these simple steps to care for your floor

DIY Cleaning Instructions

Regular Cleaning Steps:

Sweep the floor surface to remove dust and debris.

In a 5-gallon bucket, mix warm water with a small amount of standard mild dish soap.

Flood the surface with the soapy water.

Use a soft bristle broom to lightly agitate the surface and loosen dirt.

Squeegee the surface to remove water and dirt.

Finish with a thorough rinse using a garden hose, and let the floor dry completely.

Sometimes your floor needs a deeper clean or specialized care to look its absolute best.

CAUTION:

- Avoid cleaning in direct sunlight.
- Do not let soapy water dry on the surface.
- Motorcycles require a block of wood under the kick stand for a minimum of 2 weeks.
- Do not close the garage door completely, leave 6-12" above the floor until late evening or the next morning.
